FERMAX

+ Luxury

ref.4950 iLOFT Kit

This iLOFT video kit includes an iLOFT model monitor for embedded installation with hands-free operation.

Its design and materials fit in with the most cutting-edge architecture and luxury homes.

+ Security

ref.4955 MEMORY Kit

Includes a monitor with built-in image recording function. The monitor stores a picture of everyone who calls at the outdoor panel.

When you get home, you can check all the visits received. Stores up to 128 images.

GIVES YOU MAX

Compatible both for new works and replacement.

CUTTING EDGE
VIDEO DOOR ENTRY SYSTEMS

The basic

+ Complet

ref.4961 CITY Kit

It is the new version of a true classic, now with the advantages of a more robust panel and colour camera as standard issue.

Includes Colour Loft Monitor.

+ Control

ref.4984 MEMOVISION Kit

Highly recommended for offices and business since, in addition to video door entry functions, an access control is required.

The panel includes a keypad that allows opening the door by means of a code. Up to 100 codes can be programmed for different users. Includes Colour Loft Monitor.

+ Biometric

ref.4892 BIOVISION Kit

Converts the digital fingerprint into the best key to enter the home or any business premises, since it is non-transferable, unique and does not get lost.

The panel has a built-in biokey fingerprint reader. Up to 950 users can be registered. Includes Colour Loft Monitor.
